## PROGRAM DESCRIPTION

This seminar will be interactive with adequate time for discussion and comments following each speaker's presentation. The interactive component will comprise at least 25% of the sessions.

An audience polling app will be utilized as a form of interactive discussion and testing.

### **Target Audience**

- Anatomical and General Pathologists
- Postgraduate Residents and Fellows

### **Learning Objectives**

This case-based approach to pathology will go beyond looking at the basics and delve into the clinical and practical relevance of our diagnoses.

At the end of this session, participants will be able to:

- discuss recent updates on cervical cancers and their implications for clinical management
- apply molecular testing to guide targeted therapy of GYN tumors
- Identify key diagnostic features and work-up of some uncommon endometrial tumors on biopsies and resections
